ALSIDENT Suction arm, 50 mm, flexible

The tube and tube nozzle are made of anodised aluminium, the connection is made of polypropylene and the flexible hose is made of plastic. The extraction arm was developed for spot extraction without any special requirements for chemical resistance or conductivity.

The extraction arm has a self-supporting design with an internal spring and can be easily adjusted to different positions and therefore adapted to different work situations. By turning the flexible hose, it is tensioned and remains in the desired position. The extraction arm can be mounted directly through the table or for mobile installations with a table holder on the edge of the table. Assembly is quick and easy. The extraction arm can be dismantled and reassembled without tools for cleaning. The use of high-quality materials ensures a long service life and low maintenance requirements.

Properties

Mounting type:	Tischmontage
Number of joints:	0
Length (mm):	600
Diameter (mm):	50
Joints colour:	schwarz
Version:	Aluminium

Accessories

Table bracket, black, DN 50 mm
Product No.: 25010050
