DGUV Test Certificate

Name and address of the holder of the certificate (customer): TEKA Absaug- und Entsorgungstechnologie GmbH
Millenkamp 9
48653 Coesfeld
GERMANY

Product designation: **mobile welding fume separation equipment**

Type: CARTMASTER-1

Testing based on: DIN EN ISO 21904-1: (06/2020);
DIN EN ISO 21904-2: (06/2020)

Test report: 202222382/1140 dated 2022-10-31, IFA - Sankt Augustin

Further details: The model named above complies with the standard and meets the requirements of welding fume separation class "W3". The device is intended to be used for separation of fume, generated by welding, cutting and allied processes of non-ferrous metal, mild and high-alloy steel including chromium nickel steel. For recirculation of the exhaust air of the device, national regulations for health and safety at work have to be observed. In Germany exhaust air may be recirculated under consideration of the national technical rule TRGS 528. Capture of welding fume and separation of gas emissions were not within the scope of this test.
This DGUV Test-Certificate replaces the DGUV Test-Certificate with the same number, dated 2017-08-21

The type tested complies with the test basis specified above. The holder of the certificate is entitled to affix the DGUV Test mark shown overleaf to the products complying with the type tested, including the specification given under the heading further details.
The present certificate including the right to affix the DGUV Test mark is valid until: **2027-10-30**

Further provisions concerning the validity, the extension of the validity and other conditions are laid down in the Rules of Procedure for Testing and Certification.
